

APVISIONS xLAB

At Last!

AP-Visions brings you a truly affordable & reliable full function
Laboratory Information System

xLAB “manage, move, store and report data”

Based on the popular and dependable MySQL compliant database and compatible with windows XP Professional and later versions, the *xLAB* can help streamline your workflow and increase profitability.

From one doctor practices to multi-site locations, *xLAB* can meet all your data laboratory data management needs.

Now you can have the total integration of your facility to include your LIS. AP-Visions can seamlessly connect *xLAB* with the rest of your practice’s EMR, billing or practice management systems.

User friendly– now defined. Our intuitive screens make it easy for you to both operate effectively as well as train new employees. It is also easily configurable for your specific practice

“Our engineering staff has over 25 years in LIS and laboratory centric experience delivering affordable and reliable data management solutions” says Neal Flora, managing director.

Some of the xLAB features include:

- Business rules based

- Full lab management reports
 - Single patient sample and cumulative reports
 - Test volume reports
 - Billing reports
 - Interpretive reporting & reflex testing
 - Daily log
 - Prints consolidated 8 1/2 x 11 reports
- Medical Necessity Verification
 - LMRP available
 - ABN Reporting
 - ICD-9 codes
 - ICD-10 ready
- Full QC Control Management & reports
 - Levi Jennings Reports
 - Westgard Rules
- CLIA, COLA, JACHO and HIPPA compliant
- One year support with purchase

The screenshot shows the 'Editing Patient' screen in the AP-VISIONS xLAB software. It features a form for entering patient information such as MRN (500115), DOB (09/10/1937), sex (Male), and SSN (111-11-1111). There are also fields for name, address, city (Scottsdale), state (AZ), and zip (85330). A 'Sample Information' section includes fields for Lab No., fasting status, volume, units, and dates for ordered, received, and collected samples. A 'Diagnosis Codes' and 'Report Copies to' section is also visible.

The screenshot shows a laboratory report for a patient named Howard Sicket J. The report includes patient information, accession number (100125), and a table of test results for a 'Basic Metabolic Profile'. The table shows values for Carbon Dioxide, ALP, Albumin, Sodium, Potassium, and Chloride, along with their units, reference ranges, and flags.

Test	Normal	Abnormal	Flag	Units	Reference Range	Tech
Carbon Dioxide	26	+		adm	24 to 26	adm
ALP	38			adm		adm
Albumin	27.0			adm		adm
Sodium	170	++		adm	120 to 160	adm
Potassium	1.8	-		adm	3.0 to 6.3	adm
Chloride	96	-		adm	98 to 107	adm

Check out the best LIS on the market today!

Today everyone downloads their own computer software, views a tutorial and starts using their new program. That’s exactly what AP-Visions allows you to do. It is just so simple to use that you will wonder why anyone would pay other LIS vendors money for an on site installation visit. Yes we can come to your practice if the need arises, but the need is seldom there. AP-Visions ships the necessary cables to connect your instruments to your computer, does the training/ installation over the internet and the very person that does your install is the same one that you call for support. You just need to supply your own hardware.

From one instrument to many, your *xLAB* will provide you with centralized order entry and result retrieval. These same results can be sent automatically to your EMR or billing system. *xLAB* is also outreach ready, so you can have these results sent to other internet accessible devices like tablet PCs or smart phones for review.

Why wait for months to get your system installed! AP-Visions guarantees installation and go-live of your LIS within 30 days (from receipt of accepted order) or your money back! Quicker installation times are now here!

Don’t make a decision until you compare the next generation of LIS for your lab. Choose to go paperless today with the best solution!
